

Product Data Sheet

K WET 108- DRY

K WET 108-DRY is a multifunctional dispersant and wetting agent in powder form. It is easily dissolved in water and can be used in both liquid and dry applications.

Benefits : **K WET 108-DRY** can be used in dry blend formulations which require mixing with water prior to application. It will improve the wetting of the solid dry particles in the blend. Affected particles include pigment, sand, cement and fibers, as well as special effect chips and specks.

Due to **K WET 108-DRY** good wetting properties of pigments and fillers, additional benefits include more uniform color strength development, system stability and resistance to color float.

Applications: **K WET 108-DRY** is widely used in traditional wet paint, ink and caulk systems. It is also used in the manufacture of pigment dispersions as it is an effective pigment wetting and dispersion additive for both inorganic and organic pigments. It can also be used in the following:

- Mortars
- Joint fillers
- Plasters
- Leveling compounds
- Pigment-powder blends
- Cement Paints & putty
- Floor Oxide processing
- Water proofing system
- Floor Coating

Typical Properties:

Percentage Active Solids	70%
Color	Amber
Form	Powder
pH (10% in water)	6.5-7.8
Nature	Anionic
